

1/144 Scale Ruler

1. Cut out each ruler.
2. Fold on green border.
3. Laminate (I use "home lamination" -- sealing the ruler in clear packing tape.)
4. Keep one ruler in your wallet (so you don't buy more bead findings that look perfect, but are way too big) and one on your work bench (to avoid "scale creep").

Scale Check

After you print this document, compare the "scale check" to a full-size, standard ruler. If the measurement is inaccurate, check your printer settings to determine if your printer is automatically shrinking or enlarging this document. If the "scale check" ruler doesn't measure accurately, your 1/144 scale ruler will NOT measure accurately.

(For black and white printers)
